

Jquery Bootstrap Datepicker disable past dates except n number of dates

Suppose if we want to disable all the past dates except last 7days from the current date.

you can do it like this

```
jQuery(document).ready(function () {  
    var nowDate = new Date();  
    var today = new Date(nowDate.getFullYear(), nowDate.getMonth(), nowDate.getDate(), 0, 0, 0, 0);  
    jQuery('#payout_date_picker').datepicker({  
        startDate: '-7d',  
        format: 'dd-mm-yyyy',  
        autoclose:true  
    });  
  
});
```

Note: replace 7 with whatever days you want.
