

Git Setup Procedure

1. Sign up here : <https://bitbucket.org/>

2. Verify you account

3. Create user name

4. Create Repository

5. Set up your local directory

Set up Git on your machine if you haven't already.

```
mkdir /path/to/your/project
```

```
cd /path/to/your/project
```

```
git init
```

```
git remote add origin https://docs_webxpert@bitbucket.org/docs_webxpert/project_file.git
```

Create your first file, commit, and push

```
echo "kundan" >> contributors.txt
```

```
git add contributors.txt
```

```
git commit -m 'Initial commit with contributors'
```

```
git push -u origin master
```
