

How to Remove public from URL and remove index.php from URL in laravel ? Step by step solution.

Solution :

Step1 : open public folder and copy index.php

step2 : Paste index.php to root of your laravel folder (suppose your laravel folder name is laravel_project, just put file on root)

Step3 : open index.php

Step4 : Replace the following line

```
require DIR.'../bootstrap/autoload.php'; to require DIR.'bootstrap/autoload.php';  
$app = require_once DIR.'../bootstrap/app.php'; to $app = require_once DIR  
.'bootstrap/app.php';
```

Step4 : Save your file and check , you will be run your application without public in URL

Now How to remove index.php

Step1 : create .htaccess file on your laravel root folder

Step2 : Open .htaccess file

Step3 : Copy and paste following code to .htaccess file

Options -MultiViews

RewriteEngine On

Redirect Trailing Slashes...

```
RewriteRule ^(.*)/$ /$1 [L,R=301]
```

Handle Front Controller...

```
RewriteCond %{REQUEST_FILENAME} !-d
```

```
RewriteCond %{REQUEST_FILENAME} !-f
```

```
RewriteRule ^ index.php [L]
```

Step5 : Save and exit

Note : make sure that mod_rewrite should enable in your apache module, to enable [visit link](#)

Step6 : check now you will able access all route without index.php
