How to create or use multi Auth in laravel 5.2

Solution :

Step1: Now open config/auth.php and make the following changes.
Step2 :

```php
'guards' => [
'web' => [
'driver' => 'session',
'provider' => 'users',
],

'admin' => [
'driver' => 'session',
'provider' => 'admin',
],
],

'providers' => [
'users' => [
'driver' => 'eloquent',
'model' => App\User::class,
],

'admin' => [
'driver' => 'eloquent',
'model' => App\Admin::class,
],
],

'passwords' => [
'users' => [
'provider' => 'users',
'email' => 'auth.emails.password',
'table' => 'password_resets',
'expire' => 60,
],
'admin' => [
'provider' => 'admin',
'email' => 'auth.emails.password',
'table' => 'password_resets',
```

'expire' => 60,
],
],

Step3: Create a new Middleware RedirectIfNotAdmin
step4 : Now open RedirectIfNotAdmin file and add following code
